Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Please note: the electricity is not clean hydro! Thousands of acres of Quebec land, mostly belonging to indigenous people, were flooded to provide this electricity. This should not be forgotten or forgiven.

The fact is that Northern Pass does not provide power to New Hampshire and is not needed anywhere.

Thank you.

Sincerely,
Jane Doherty
